Constructed from 1.6mm galvanised steel sheet for strength and durability, the flat deck and clean lines makes it look good and allows small items to be carried loose on the trolley.

Fitted with 200mm fixed centre wheels and 125mm swivel castors to each corner (with this design there is a slight rock from end to end built into the trolley to ensure that the centre wheels are always in contact with the ground). This provides a low push effort and good carrying capacity due to the large centre wheels as well as excellent manoeuvrability because of the swivel castors.

INDUSTRIAL TROLLEYS

60% less effort to tilt back a fully loaded trolley*
Perfect load balance over wheels with a full load.

The secret is in the axle

Simply tap the axle lock lever with your foot, so the axle can "float" and tilt the trolley backwards. You won't believe heavy loads can feel so light. Axle lock re-engages automatically when the trolley is returned to its upright position.

Baldini Floating Axle™

Customer testimonial

"Easi Tilt Trolleys are a top quality product. All our drivers love them as they make their job so much easier. I can highly recommend them."

THE TEAM SYSTEMS 'DIY CONVEYOR SYSTEM'

Team Systems full range of Imported Gravity Conveyors provides the simple solution for moving all types of products in industries such as transport, distribution centres, container unloading & similar.

Roller Conveyor are one of the most common types of conveyors applied in conveying flat bottom type products such as cases, boxes, pallets & trays. These kind of conveyors improve efficiency distribution & line links between different stages of production of your product.

STEP 1

STEP 1.

- Choose type of Roller
- Choose length of Roller.
- Choose number of Rollers.

STEP 2

STEP 2.

- Choose matching Frame width.
- Choose length of Frame.

STEP 3

STEP 3.

- Choose matching Stands to suit Conveyor Frame.

ASSEMBLED CONVEYOR

PVC ROLLERS

STEEL ROLLERS

Team Systems Gravity Conveyor is ideally suited to handling operations which cannot justify the expense of powered equipment. They provide efficient handling at negligible running costs.

Gravity Conveyors are very easy to set up, dismantle or re-locate.

Available with either PVC or zinc plated rollers and three standard widths.

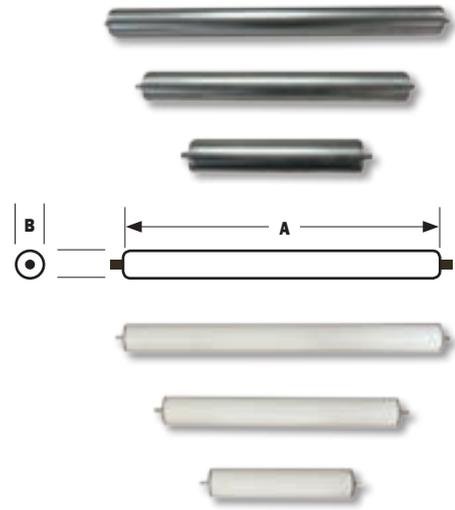

Rollers have spring loaded shafts for easy installation and hassle free maintenance.

It is recommended that there be a minimum of three rollers under the goods to be transported at any time.

Roller Pitch is determined by the size of goods to be transported, in the instances of various sizes, roller pitch is determined by the size of the smallest goods to be transported.

CONVEYOR SYSTEMS

The frames are made from strong mild steel and powder coated finish in royal blue. Interlocking sections make for greater flexibility for additions and subtractions of further lengths.

Team Systems Adjustable Conveyor Stands provide a rigid footing for Gravity Conveyors.

Adjustable height provides flexibility in application.

It is recommended that Conveyor Stands be securely fixed into position.

All tanks are moulded from industrial food grade LDPE resin and have a high resistance to impact and chemical attack. They are stabilised against ultra-violet radiation and will withstand direct sunlight for many years. Operating temperatures range from -40°C to more than 60°C. Standard tank colours are natural and black, other colours are available on request. BSP threaded fittings and flanges used for tank outlets and valves are available for all tanks.

CUSTOM DESIGN & MANUFACTURE

Team Systems can manufacture to suit your individual requirements.

Our new, large manufacturing workshop at our Victorian Head Office in Dandenong South can cater to any custom made or specialised project your business requires.

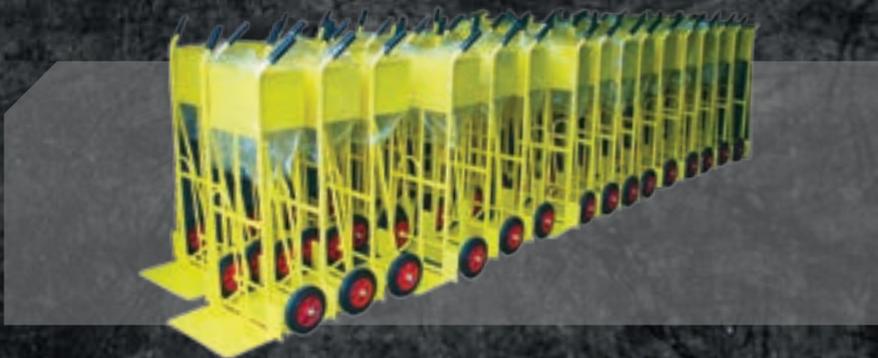

With most of our manufacturing employees working in our business for 5, 10 or more years, there is a great deal of pride in the quality and workmanship of our products.

We are proud of our award winning designs throughout our local and national distribution system.

All cutting, tube bending, punching, welding and assembly work is completed in-house under strict quality control procedures.

We also have the ability to customise your designs on medium and large size orders to suit your needs.
